

COVID-19 AND NUTRACEUTICALS

A Guidebook

The book, in which Chandan Prasad and Güler Öztürk, serve as editors, is a compilation of reviews of data on different nutraceuticals, or products used as alternatives to pharmaceuticals, that may be of relevance to the COVID-19 pandemic. These include probiotics, melatonin, plant bioactives, liponic acid, curcumin, selenium, zinc, magnesium and boron, ISBN: 978-81-952852-1-1
